## Circle Sample Cutter **G236A**

Stable Reliable Consistent

## G236A Circle Sample Cutter — Specify unit area for sample sampling

G236A Circle Sample Cutter is used for sampling circular samples of all kinds of fabrics, paper and non-woven fabrics materials and etc .it can be used to cut the Circular samples of various kinds of wool, cotton, chemical fiber and knitted fabrics .it is widely used in textile, papermaking, packaging, testing and scientific research industries,etc .

### G236A Circle Sample Cutter

1.when sampling the sample, lay the fabric to be cut on the rubber pad,put the circle sample cutter on the fabric ,pull-out the locking device on the sample cutter ,rotate about 90 angles with a hand holding the outer cover and the other holding the corrugated handwheel,conduct a definite pressure ,then rotate the corrugated handwheel deasil(The Angle of rotation is bigger than 90 ),the circle sample can be cut .after the using ,lock the locking device and rotate to the original position .so that the blade can not be exposed to avoid hurting hands or other objects.

2.This instrument with an integral design mainly consists of outer cover 、 handle、 blade fixing rack and rotation table .

### Standards compliant

ISO 3801      ASTM D3776      GB/T 4669

## G236A Circle Sample Cutter — Several Major Features

### Anti-slip design

There is diagonal grain nick at the bottom of the instrument which is used for fixing the sample to make it easy to cut and avoid slipping of sample.

### imported blade

The blades of the cutter are bilateral imported blades with four pcs totally. It quarters and distributes equispaced with external connection.

### Adjustable sampling thickness

The height of the instrument's blade is adjustable. The samples with different thickness can be cut with the advantages of high accuracy and easy operation etc.

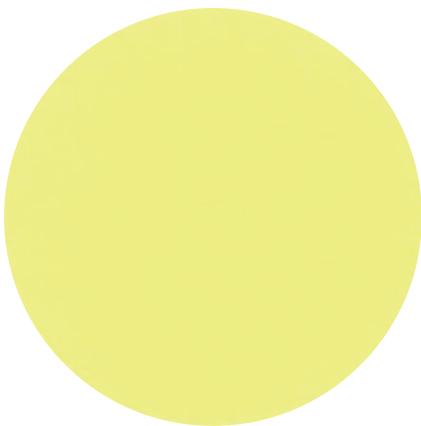

### flexible and compact design

The flexible and compact design makes it very convenient to install the instrument. From the laboratory to the production line, it can be installed to conduct the test at anytime and anywhere.

Stable Reliable Consistent

## G236A Circle Sample Cutter—— Field Application

G236A Circle sample cutter is used to sample for circular sample of various kinds of fabrics, paper and non-woven materials and etc to prepare for the testing.

It is applicable to the performance verification of new products, quality control of the production department, and the material properties for the third-party testing organization, the product performance verification laboratory, and the quality and technical supervision department, etc.

## G236A Circle Sample Cutter — Configuration parameter

Standard configuration

236A01

Sampler pad/EVA

236A02

Blade(4 pcs /packet)

### Technical Parameters

Blade :imported	Weight:1kg
Test mode:manual	Power:No
Sampling area:11.3CM <sup>2</sup>	External Diamension:80mm*80mm*120mm
Sample thickness:top at 5mm
